Doosan Infracore America Forklift dealers successfully operate in over 220 service and product sales places throughout Canada and the U.S. The forklift product line remarkably comprises of 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these various truck models range from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest emerging forklift and lift truck company in the North American market, thanks to its exceptional level of product performance and their consistently high level of buyer support and service given to all Doosan Infracore Forklift clients. The U.S. forklift division located in Cleveland has a professional team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

In the beginning the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a home-based machinery expansion venture. Sales of these products were initially targeted to state-run firms, large scale corporations, and the armed forces. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Daewoo began the first home-based forklift business in 1967, and quickly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a situation of significant growth of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling market. This plan drastically expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a contemporary plant which helped establish the business for the fabrication of high added-value products suited for export. In 1993, the company had a global sales network and started exporting designs they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
