

Concrete Hopper

Concrete Hopper - This attachment is a self-dumping hopper that automatically activates to dump whenever bumper release contacts the side of a dumpster. After unloading is done, the hopper goes back to an upright and locked position. This piece of equipment is also offered together with a cable that allows operation from the seat of the lift truck so as to have the choice of manually unloading the hopper. There is a locking chain provided to secure the hopper to the tine truck. This product is constructed with consistent and reliable robotic welds for maximum strength. The lift truck dumping hopper also has a blue powder coat finish in order to maintain durability.
